EF5001U - Utility Pellet Heater

At **EPI** continued innovation and product improvement is our goal. We are proud to announce our new pellet model, the EF5001 Utility Heater for 2006. This product has a 120 lbs hopper and built-in battery storage in the base. Options include the popular autolite system which incorporates several improvements including updated operation software, feed disk systems, and burn pot. These improvements are designed to simplify installation adjustments and consumer operation. Additionally, the burn pot changes allow for better ash ejection and cleaner running. For consumers looking for a unique product look, the EF5001U will also be available with stainless steel cabinet. Only EasyFire!
